Website Visitors

Like most website operators, Pymesign collects non-personally-identifying information of the sort that web browsers and servers typically make available, such as the browser type, language preference, referring site, and the date and time of each visitor request. Pymesign's purpose in collecting non-personally identifying information is to better understand how Pymesign's visitors use its website. From time to time, Pymesign may release non-personally-identifying information in the aggregate, e.g., by publishing a report on trends in the usage of its website.

Pymesign also collects potentially personally-identifying information like Internet Protocol (IP) addresses for logged in users and for users leaving comments on <https://outsourcing.pymesign.com> blog posts. Pymesign only discloses logged in user and commenter IP addresses under the same circumstances that it uses and discloses personally-identifying information as described below.

Gathering of Personally-Identifying Information

Certain visitors to Pymesign's websites choose to interact with Pymesign in ways that require Pymesign to gather personally-identifying information. The security of your Personal Information is important to us, but remember that no method of transmission over the Internet, or method of electronic storage is 100% secure. While we strive to use commercially acceptable means to protect your Personal Information, we cannot guarantee its absolute security.
